Kiączyń, 18.05.2011

Dear Sirs/Madams:

Our company, Grassland Farms, started its operation in western Poland in 1997. We were pioneers on the Polish market and it was largely possible thanks to our “sod guru”- Mr. Gerry Brouwer of Kesmac/Brouwer Inc.

Many years ago, we approached Gerry as total strangers and asked for guidance in setting up sod production in another country. He never said “no”. Despite his busy schedule, he always made time to meet with us and to share his extensive experience. Needless to say, he did it out of his free will and for free. I think it’s rare to find such individuals in today’s world.

With Gerry’s help we were able to build a successful farm that keeps growing. Throughout the years we’ve depended on Kesmac equipment to harvest and maintain our fields. We can truly attest to its superior quality that rarely requires “intervention”. Any time, something went wrong, we could always rely on Kesmac’s staff quick help despite the fact we are oceans apart. We got to know Gerry’s son Eric who heads the plant in Keswick and are extremely happy to be his customers. We like to work with so many people at the plant and office (Charlene, Don, Lisa and Susan...to name just a few), it feels like we drop by family friends’ whenever we come to pick up some parts.

We will always remain deeply grateful to Gerry Brouwer for his contribution into our company’s foundation. In fact, we consider him our “Godfather”. We are extremely lucky to do business with such a reputable company as Kesmac/Brouwer, and wholeheartedly recommend it to everyone.

Sincerely,

Ewa Adamczyk

Grassland Farms Sp. z o.o.
